COUNCIL OF PLANNING LIBRARIANS : Exchange Bibliography #532

A SOCIAL ECOLOGICAL BIBLIOGRAPHY

by

Joel C. Snell

and

R. Gary Dean

Dept. of Sociology
Dana College
Blair, Nebraska 68008

Social ecology is a subfield of sociology that incorporates the influences of not only sociology but economics, biology, economics, political science and urban studies. The term "social ecology" was first popularized by Professor Robert Park of the University of Chicago.

This bibliography encompasses literature for urban planners, ecologists, and urban analysts. Included in the list are such topics as population, environmental pollution, energy shortage, urban crisis, suburban sprawl, and city hall politics. The bibliography was originally constructed as background material for a federally funded urban system analysis containing a 50 year projection.
